- **International Conference on Alzheimer's & Parkinson's Disease (AD/PD), March 28 – April 1, 2023 Gothenburg, Sweden**
  - Amila Zuko, Ph.D., scientist in adult neurology, will deliver an oral presentation on preclinical mouse data on an intrastrially delivered AAV product candidate focused on a combination approach of increasing protective APOE variants and lowering toxic APOE variants as a therapy for Alzheimer Disease.

### About uniQure

uniQure is delivering on the promise of gene therapy – single treatments with potentially curative results. The recent approvals of our gene therapy for hemophilia B – an historic achievement based on more than a decade of research and clinical development – represents a major milestone in the field

of genomic medicine and ushers in a new treatment approach for patients living with hemophilia. We are now leveraging our modular and validated technology platform to advance a [pipeline](#) of proprietary gene therapies for the treatment of patients with Huntington's disease, refractory temporal lobe epilepsy, ALS, Fabry disease, and other severe diseases.
